

**Abstract**

Aqueous dispersions containing at least:

- 5 a) a copolymer of compounds corresponding to formula (I):

10 in which  $R^1$  is a branched or unbranched alkyl group containing 8 to 22 carbon atoms and  $R^2$  is a hydrogen atom or an alkyl group containing 1 to 4 carbon atoms, with monomers selected from compounds corresponding to formula (Ia):

15 in which  $R^3$  is a branched or unbranched alkyl group containing 1 to 6 carbon atoms and  $R^4$  is a hydrogen atom or an alkyl group containing 1 to 4 carbon atoms, and

- 20 b) a copolymer of compounds corresponding to formula (II):

25 in which  $R^5$  is a hydrogen atom or an alkyl group containing 1 to 4 carbon atoms and  $n$  is a number of 4 to 12, with monomers selected from compounds corresponding to formula (Ia), and

- c) emulsifiers,

with the proviso that the ratio by weight between the copolymers a) and the copolymers b) is 10:1 to 1:10.
